

340°C. Halogen-Free Flame Resistance. Now *that's* hot.

Ticona enables eco-friendly innovation... *Today.*

Ticona Engineering Polymers, the global leader in LCP for connectors, knows high-performance E/E components and what it takes to help you meet the ever-increasing demands of the electronics market.

Vectra® LCP delivers:

- Halogen-free flame resistance without flame-retardant additives
- High temperature resistance (short-term up to 340°C) for lead-free soldering
- High-flow characteristics to fill long, thin and complex flow paths
- Extremely fast cycle times over long production runs
- Very high HDT and low CTE

Portfolio of High-Performance Solutions for Greener Electronics:

Vectra® LCP

The proven performer. Halogen free without flame-retardant additives.
Always was, always will be.

Celanex® XFR™ PBT and Riteflex® XFR™ TPC-ET

Polyesters With a Halogen-free Flame Retardant System

Fortron® PPS

Free of Halogenated Flame Retardants

Navigating the Green Landscape

We focus the full power of our world-class engineering polymers, global reach, deep technical knowledge, and design and application development experience to help you navigate the green landscape.
